DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 64-95 and 105-108, drawn to methods for producing a long-term culture of immature dendritic cells, classified in class 435, subclass 325, 455, for example.
- II. Claims 96-104, and 109, drawn to a population of immature dendritic cells and a pharmaceutical composition containing immature dendritic cells, a method of treating a patient by immunotherapy comprising administering an effective amount of immature dendritic cells, classified in class 800, subclass 3, 8, 9, 11, 13, 18, class 514, subclass 44, class 424, subclass 93.21 and class 435, subclass 325, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are mutually exclusive and independent. The methods for producing dendritic cells of Invention I are not required for the methods of treatment of Invention II, and vice versa. Each of the methods requires a materially separate and different protocol.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1632

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
